Assignment-14.5

A.Laxmi prasanna

2303A51033

Batch-23

Task 1 – Image Gallery Website

Create an image gallery web page.

Requirements:

• Display images in a grid layout.

• Use AI to:

o Optimize layout using CSS Grid.

o Add hover zoom or overlay effects.

o Ensure mobile responsiveness.

webpage.html > html

```html
<!--Create an image gallery web page and Display images in a grid layout,Optimize layout using CSS Grid,Add hover zoom or overlay effects.Ensure mobile responsiveness.-->
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Image Gallery</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            padding: 0;
            background-color: #f0f0f0;
        }
        .gallery {
            display: grid;
            grid-template-columns: repeat(auto-fit, minmax(200px, 1fr));
            gap: 15px;
            padding: 20px;
        }
        .gallery-item {
            position: relative;
            overflow: hidden;
        }
        .gallery-item img {
            width: 100%;
            height: auto;
            transition: transform 0.3s ease;
        }
        .gallery-item:hover img {
            transform: scale(1.1);
        }
        @media (max-width: 600px) {
            .gallery {
                grid-template-columns: repeat(auto-fit, minmax(150px, 1fr));
            }
        }
```

```html
                grid-template-columns: repeat(auto-fit, minmax(150px, 1fr));
            }
        }
    </style>
</head>
<body>
    <h1 style="text-align: center; padding: 20px;">Image Gallery</h1>
    <div class="gallery">
        <div class="gallery-item">
            <img src="https://via.placeholder.com/400x300" alt="Image 1">
        </div>
        <div class="gallery-item">
            <img src="https://via.placeholder.com/400x300" alt="Image 2">
        </div>
        <div class="gallery-item">
            <img src="https://via.placeholder.com/400x300" alt="Image 3">
        </div>
        <div class="gallery-item">
            <img src="https://via.placeholder.com/400x300" alt="Image 4">
        </div>

        </div>
    </div>
</body>
</html>
```

OUTPUT:

Task 2 – Profile Card Generator

Create a profile card web page.

Requirements:

• Display user image, name, role, and social media links.

• Use AI to:

o Suggest modern UI colors and fonts.

o Design the card using Flexbox.

o Add hover animation and shadow effects

profilecrad.html > ...
